\*\*\* When a new drug class is reviewed, all drugs currently on the market are reviewed for the first time. New drugs to the market falling into one of the drug classes scheduled for review are reviewed under that class. Other drugs that are new to the market and do not fall into one of the drug classes scheduled for review may be reviewed “off-cycle”. New drugs that enter the market within 90 days of the meeting will be reviewed at the subsequent quarterly meeting. \*\*\*
